Alex Rivera
Full Stack Software Engineer | React, TypeScript, Python & FastAPI | Building Scalable Systems
[Profile Photo: Yes]

About
I am a results-driven Full Stack Software Engineer experienced in designing and delivering high-performance web applications and distributed backends. Proficient in Python, FastAPI, React, TypeScript, PostgreSQL, and Docker, with a track record of building production-grade services. Passionate about system design, clean API architecture, and collaborating on high-impact products.

Experience
Software Engineering Intern at Acme Cloud Solutions
Summer 2023 - Present
Developed REST API endpoints using FastAPI and PostgreSQL, serving 50k daily active users. Containerized microservices using Docker.

Projects
Readiness Copilot
Built full-stack placement readiness platform with Python, FastAPI, and React.

Skills
Python, TypeScript, JavaScript, React, FastAPI, Node.js, PostgreSQL, Docker, Git, Redis, SQL
