JORDAN SMITH
jordan.smith@university.edu | (555) 987-6543
https://github.com/jordansmith | https://linkedin.com/in/jordansmith-engineer

PROFESSIONAL SUMMARY
Senior computer science undergraduate with 3 internships and deep interest in distributed systems, machine learning, and backend scalability. Proficient in Python, Go, and Kubernetes.

EDUCATION
Metropolitan Institute of Technology
Master of Science in Software Engineering, Expected 2025
Bachelor of Science in Computer Science, 2023

SKILLS
Python, Go, Java, Kubernetes, Docker, AWS, GCP, PostgreSQL, MongoDB, Redis, Kafka, CI/CD, Linux

WORK EXPERIENCE

Distributed Systems Intern | Global Data Corp | Jan 2023 - Aug 2023
- Designed streaming telemetry ingestion pipeline processing 10M records/day with Kafka and Go.
- Orchestrated 45-node Kubernetes cluster deployments across AWS and GCP.
- Implemented automated monitoring and alerting with Prometheus and Grafana.

Backend Development Intern | TechFlow Dynamics | May 2022 - Dec 2022
- Maintained core microservices using Python and PostgreSQL.
- Optimized database query bottlenecks reducing p99 latency from 450ms to 85ms.

PROJECTS

Event Stream Processing Engine | https://github.com/jordansmith/stream-engine
- High performance pub-sub engine written in Go with Raft consensus protocol.
- Benchmarked at 150k messages per second on single-node benchmarks.

Cloud Resource Allocator | https://github.com/jordansmith/allocator | https://allocator-demo.org
- Intelligent VM scheduling simulator leveraging Python, Pandas, and Scikit-Learn.

AWARDS & CERTIFICATIONS
- Published paper on lightweight consensus in IEEE Student Symposium 2023.
- Certified Kubernetes Administrator (CKA).
